Check-Inn®

By Innsoft Inc.

EMV Credit Card Update

If you haven't started processing credit cards using the EMV chip, you should really consider upgrading your processing today. EMV chip cards have drastically decreased card present fraud. Visa recently reported, "Merchants who accept chip cards witnessed a 76 percent dip in card present (CP) counterfeit payment fraud since the U.S. payments industry began the shift to EMV chip in 2011."

Just remember that after the liability shift that was adopted on October 1st, 2015, if you use the magnetic stripe on an EMV card and the transaction is deemed fraudulent, you, the merchant, will be liable for the charge.

Visa Chip Card Update

EMV chip cards and chip-activated merchants combat counterfeit fraud in the U.S.

For merchants who have completed the chip upgrade, counterfeit fraud dollars

dropped $\sqrt{76\%}$

March 2019

In December 2018 compared to September 2015

Over 3.5M merchant locations are now accepting chip cards

Integrate EMV for Check-Inn Today!

Innsoft has valued our long-standing partnerships with Zeamster and Fortis Payments to offer a fully-integrated EMV solution for Check-Inn. Processing cards using the EMV

> chip will greatly reduce the risk of card present fraud. In addition, we have further increased security by introducing credit card tokenization. Tokenization greatly reduces your PCI scope since credit cards are no longer stored in your Check-Inn system.

Visit innsoft.com or click here to view more on tokenization

New Reports for Check-Inn Coming Soon!

Innsoft has been working on making it easier to view your property's statistics by creating two new reports in Check-Inn.

The Quick View by Date reports can be found in the Occupancy Report and the Forecasting Report menus. Quickly see up to 31 days of your property's occupancy stats, room revenue, average daily rates, revenue per available room, and more!

These reports will be out in a few weeks so make sure to grab the next update for Check-Inn so you can see for yourself!
