Passport Scanner Available Now!

Fully Integrated into Check-Inn for $1000

We have integrated a state-of-the-art passport scanner for Check-Inn. The passport scanner can work in conjunction with our advanced ID scanner or as a stand-alone unit. With its built-in auto-triggering image detection, it will quickly take a one-sided image of any passport and inputs the guest information directly into Check-Inn. In addition, we made it so that it will decode the barcode found on driver's licenses or ID cards.
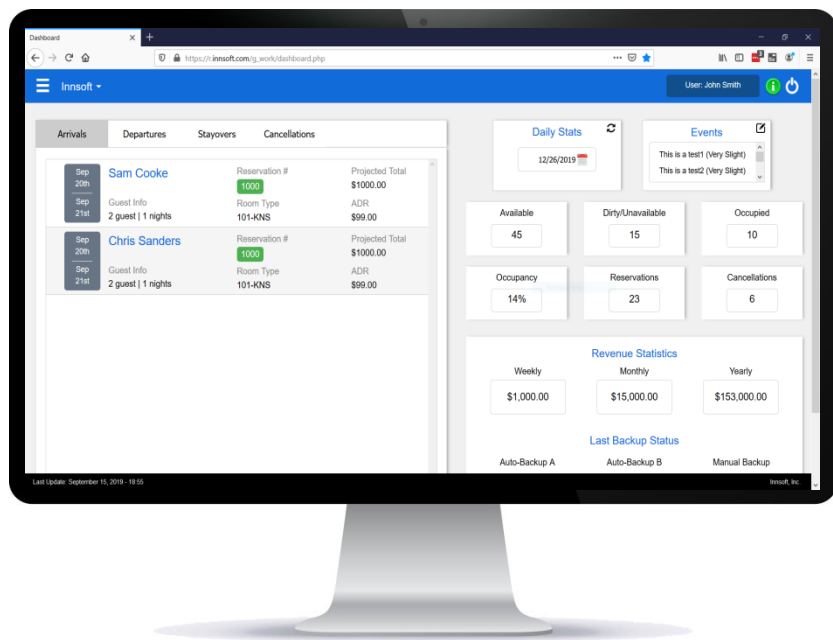

Key Features of Passport Scanner:

- ✓ **400 DPI high-resolution imaging**

- ✓ **No moving parts which increases durability**

- ✓ **Auto-triggering document detection**

- ✓ **Auto-fills passport information into Check-Inn**

- ✓ **Can decode driver's license barcode**

- ✓ **Scanning window 88mm x 125mm**

- ✓ **Connects to computer via USB 2.0**

Dimensions:
16.2 (w) x 19 (d) x 15.7 (h) cm

Webservices Pro for Check-Inn

Manage your Check-Inn System Online

Innsoft is working on a new version of Webservices called Webservices Pro that will allow you to perform most of your daily operations directly from a secure website. In addition to viewing reports, you will be able to manage guests, create and modify reservations, view guest history, and manage housekeeping. We anticipate completion in Q4 of 2020. More details to come!
